MIDDLE-LEVEL CURRICULUM

A SYNERGISTIC SYSTEM

STANDARDS CORRELATION REPORT

Wednesday, May 28, 2014

STANDARDS FROM

Virginia | Standards of Learning | Science (2003)

Grade Five, Grade Six

Pitsco Education Standards Correlation Report

STANDARDS/BENCHMARKS ADDRESSED SUMMARY

How to Interpet:

When reviewing the "Standards/Benchmarks Addressed Summary," all curriculum statements from your organization are considered in the accounting of items addressed. Under this reporting structure, if a child statement (bench mark) is considered "addressed," its parent statement (standard) is also considered addressed. in cases where there are three or more levels of statements (i'e.grandparent;parent;child),all levels above the lowest level that is addressed are also considered addressed. Reporting from this analysis consider each statement as being of equal value.

- Grade Five standards covered :0 of 45 (0%)
- Grade Six standards covered :4 of 77 (5%)

Standards/Benchmarks Addressed

BENCHMARKS ADDRESSED SUMMARY

How to Interpet:

Benchmarks are considered the statements at the lowest level of the document. When reviewing the "Benchmarks Addressed Summary," only the curriculum statements at the lowest level are being reported

- Grade Five standards covered :0 of 32 (0%)
- Grade Six standards covered :2 of 62 (3%)

Benchmarks Addressed

COVERAGE REPORTS ORGANIZED BY STANDARDS/BENCHMARK

This section of the reports lists each curriculum statement in the set choosen for this report and the the titles that address them .Statements that are colored gray are not aaddressed by any title in the title set chosen for this report

Grade Five

- Grade Five standards covered :0 of 45 (0%)
- Grade Five standards covered :0 of 32 (0%)

	Grade Five Virginia Standards of Learning Science (2003)
	Scientific Investigation, Reasoning, and Logic
5.1	The student will plan and conduct investigations in which
5.1.a	rocks, minerals, and organisms are identified using a classification key;
5.1.b	estimations of length, mass, and volume are made;
5.1.c	appropriate instruments are selected and used for making quantitative observations of length, mass, volume, and elapsed time;
5.1.d	accurate measurements are made using basic tools (thermometer, meter stick, balance, graduated cylinder);
5.1.e	data are collected, recorded, and reported using the appropriate graphical representation (graphs, charts, diagrams);
5.1.f	predictions are made using patterns, and simple graphical data are extrapolated;
5.1.g	manipulated and responding variables are identified; and
5.1.h	an understanding of the nature of science is developed and reinforced.
	Force, Motion, and Energy
5.2	The student will investigate and understand how sound is transmitted and is used as a means of communication. Key concepts include

	Grade Five Virginia Standards of Learning Science (2003)
5.2.a	frequency, waves, wavelength, vibration;
5.2.b	the ability of different media (solids, liquids, and gases) to transmit sound; and
5.2.c	uses and applications (voice, sonar, animal sounds, and musical instruments).
5.3	The student will investigate and understand basic characteristics of visible light and how it behaves. Key concepts include
5.3.a	the visible spectrum and light waves;
5.3.b	refraction of light through water and prisms;
5.3.c	reflection of light from reflective surfaces (mirrors);
5.3.d	opaque, transparent, and translucent; and
5.3.e	historical contributions in understanding light.
	Matter
5.4	The student will investigate and understand that matter is anything that has mass; takes up space; and occurs as a solid, liquid, or gas. Key concepts include
5.4.a	atoms, elements, molecules, and compounds;
5.4.b	mixtures including solutions; and
5.4.c	effect of heat on the states of matter.
	Living Systems
5.5	The student will investigate and understand that organisms are made of cells and have distinguishing characteristics. Key concepts include
5.5.a	basic cell structures and functions;
5.5.b	kingdoms of living things;

	Grade Five Virginia Standards of Learning Science (2003)
5.5.c	vascular and nonvascular plants; and
5.5.d	vertebrates and invertebrates.
	Interrelationships in Earth/Space Systems
5.6	The student will investigate and understand characteristics of the ocean environment. Key concepts include
5.6.a	geological characteristics (continental shelf, slope, rise);
5.6.b	physical characteristics (depth, salinity, major currents); and
5.6.c	biological characteristics (ecosystems).
	Earth Patterns, Cycles, and Change
5.7	The student will investigate and understand how the Earth's surface is constantly changing. Key concepts include
5.7.a	the rock cycle including the identification of rock types;
5.7.b	Earth history and fossil evidence;
5.7.c	the basic structure of the Earth's interior;
5.7.d	plate tectonics (earthquakes and volcanoes);
5.7.e	weathering and erosion; and
5.7.f	human impact.

Grade Six

- Grade Six standards covered :4 of 77 (5%)
 Grade Six standards covered :2 of 62 (3%)

	Grade Six Virginia Standards of Learning Science (2003)
	Scientific Investigation, Reasoning, and Logic
6.1	The student will plan and conduct investigations in which
	Organism Reproduction 3.1.0
6.1.a	observations are made involving fine discrimination between similar objects and organisms;
	Organism Reproduction 3.1.0
6.1.b	a classification system is developed based on multiple attributes;
6.1.c	precise and approximate measures are recorded;
6.1.d	scale models are used to estimate distance, volume, and quantity;
6.1.e	hypotheses are stated in ways that identify the independent (manipulated) and dependent (responding) variables;
6.1.f	a method is devised to test the validity of predictions and inferences;
6.1.g	one variable is manipulated over time with many repeated trials;
6.1.h	data are collected, recorded, analyzed, and reported using appropriate metric measurement;
6.1.i	data are organized and communicated through graphical representation (graphs, charts, and diagrams);
6.1.j	models are designed to explain a sequence; and
6.1.k	an understanding of the nature of science is developed and reinforced.
	Organism Reproduction 3.1.0
	Force, Motion, and Energy
6.2	The student will investigate and understand basic sources of energy, their origins, transformations, and uses. Key concepts include
6.2.a	potential and kinetic energy;

	Grade Six Virginia Standards of Learning Science (2003)
6.2.b	the role of the sun in the formation of most energy sources on Earth;
6.2.c	nonrenewable energy sources (fossil fuels, including petroleum, natural gas, and coal);
6.2.d	renewable energy sources (wood, wind, hydro, geothermal, tidal, and solar); and
6.2.e	energy transformations (heat/light to mechanical, chemical, and electrical energy).
6.3	The student will investigate and understand the role of solar energy in driving most natural processes within the atmosphere, the hydrosphere, and on the Earth's surface. Key concepts include
6.3.a	the Earth's energy budget;
6.3.b	the role of radiation and convection in the distribution of energy;
6.3.c	the motion of the atmosphere and the oceans;
6.3.d	cloud formation; and
6.3.e	the role of heat energy in weather-related phenomena including thunderstorms and hurricanes.
	Matter
6.4	The student will investigate and understand that all matter is made up of atoms. Key concepts include
6.4.a	atoms are made up of electrons, protons, and neutrons;
6.4.b	atoms of any element are alike but are different from atoms of other elements;
6.4.c	elements may be represented by chemical symbols;
6.4.d	two or more atoms may be chemically combined;
6.4.e	compounds may be represented by chemical formulas;

	Grade Six Virginia Standards of Learning Science (2003)
6.4.f	chemical equations can be used to model chemical changes; and
6.4.g	a limited number of elements comprise the largest portion of the solid Earth, living matter, the oceans, and the atmosphere.
6.5	The student will investigate and understand the unique properties and characteristics of water and its roles in the natural and human-made environment. Key concepts include
6.5.a	water as the universal solvent;
6.5.b	the properties of water in all three states;
6.5.c	the action of water in physical and chemical weathering;
6.5.d	the ability of large bodies of water to store heat and moderate climate;
6.5.e	the origin and occurrence of water on Earth;
6.5.f	the importance of water for agriculture, power generation, and public health; and
6.5.g	the importance of protecting and maintaining water resources.
6.6	The student will investigate and understand the properties of air and the structure and dynamics of the Earth's atmosphere. Key concepts include
6.6.a	air as a mixture of gaseous elements and compounds;
6.6.b	air pressure, temperature, and humidity;
6.6.c	how the atmosphere changes with altitude;
6.6.d	natural and human-caused changes to the atmosphere;
6.6.e	the relationship of atmospheric measures and weather conditions;
6.6.f	basic information from weather maps including fronts, systems, and basic measurements; and
6.6.g	the importance of protecting and maintaining air quality.

	Grade Six Virginia Standards of Learning Science (2003)
	Living Systems
6.7	The student will investigate and understand the natural processes and human interactions that affect watershed systems. Key concepts include
6.7.a	the health of ecosystems and the abiotic factors of a watershed;
6.7.b	the location and structure of Virginia's regional watershed systems;
6.7.c	divides, tributaries, river systems, and river and stream processes;
6.7.d	wetlands;
6.7.e	estuaries;
6.7.f	major conservation, health, and safety issues associated with watersheds; and
6.7.g	water monitoring and analysis using field equipment including hand-held technology.
	Interrelationships in Earth/Space Systems
6.8	The student will investigate and understand the organization of the solar system and the relationships among the various bodies that comprise it. Key concepts include
6.8.a	the, sun, moon, Earth, other planets and their moons, meteors, asteroids, and comets;
6.8.b	relative size of and distance between planets;
6.8.c	the role of gravity;
6.8.d	revolution and rotation;
6.8.e	the mechanics of day and night and phases of the moon;
6.8.f	the unique properties of Earth as a planet;
6.8.g	the relationship of the Earth's tilt and seasons;

	Grade Six Virginia Standards of Learning Science (2003)
6.8.h	the cause of tides; and
6.8.i	the history and technology of space exploration.
	Resources
6.9	The student will investigate and understand public policy decisions relating to the environment. Key concepts include
6.9.a	management of renewable resources (water, air, soil, plant life, animal life);
6.9.b	management of nonrenewable resources (coal, oil, natural gas, nuclear power, mineral resources);
6.9.c	the mitigation of land-use and environmental hazards through preventive measures; and
6.9.d	cost/benefit tradeoffs in conservation policies.

COVERAGE REPORT ORGANIZED BY PRODUCT TITLE

This section of the reports lists each curriculum statement in the set choosen for this report and the titles that address them .Statements that are colored gray are not aaddressed by any title in the title set chosen for this report

Organism Reproduction 3.1.0

- Grade Five standards covered :0 of 45 (0%) (0 unique)
- Grade Six standards covered :4 of 77 (5%) (3 unique)

Grade Five

No correlations are available for this product using the selected report criteria

Grade Six

	Grade Six Virginia Standards of Learning Science (2003)
6.1	The student will plan and conduct investigations in which
*6.1.a	observations are made involving fine discrimination between similar objects and organisms;
*6.1.k	an understanding of the nature of science is developed and reinforced.

Music & Sound 3.3.0

- Grade Five standards covered :0 of 45 (0%) (0 unique)
- Grade Six standards covered :0 of 77 (0%) (0 unique)

Grade Five

No correlations are available for this product using the selected report criteria

Grade Six

Grade Six Virginia|Standards of Learning | Science (2003)

Mobile Apps 3.0.0

- Grade Five standards covered :0 of 45 (0%) (0 unique)
- Grade Six standards covered :0 of 77 (0%) (0 unique)

Grade Five

No correlations are available for this product using the selected report criteria

Grade Six

STANDARDS/BENCHMARKS NOT ADDRESSED SUMMARY

This section of the report shows all standards that are not addressed by the set of titles used to create this report

Grade Five

	Grade Five Virginia Standards of Learning Science (2003)
	Scientific Investigation, Reasoning, and Logic
5.1	The student will plan and conduct investigations in which
5.1.a	rocks, minerals, and organisms are identified using a classification key;
5.1.b	estimations of length, mass, and volume are made;
5.1.c	appropriate instruments are selected and used for making quantitative observations of length, mass, volume, and elapsed time;
5.1.d	accurate measurements are made using basic tools (thermometer, meter stick, balance, graduated cylinder);
5.1.e	data are collected, recorded, and reported using the appropriate graphical representation (graphs, charts, diagrams);
5.1.f	predictions are made using patterns, and simple graphical data are extrapolated;
5.1.g	manipulated and responding variables are identified; and
5.1.h	an understanding of the nature of science is developed and reinforced.
	Force, Motion, and Energy
5.2	The student will investigate and understand how sound is transmitted and is used as a means of communication. Key concepts include
5.2.a	frequency, waves, wavelength, vibration;

	Grade Five Virginia Standards of Learning Science (2003)
5.2.b	the ability of different media (solids, liquids, and gases) to transmit sound; and
5.2.c	uses and applications (voice, sonar, animal sounds, and musical instruments).
5.3	The student will investigate and understand basic characteristics of visible light and how it behaves. Key concepts include
5.3.a	the visible spectrum and light waves;
5.3.b	refraction of light through water and prisms;
5.3.c	reflection of light from reflective surfaces (mirrors);
5.3.d	opaque, transparent, and translucent; and
5.3.e	historical contributions in understanding light.
	Matter
5.4	The student will investigate and understand that matter is anything that has mass; takes up space; and occurs as a solid, liquid, or gas. Key concepts include
5.4.a	atoms, elements, molecules, and compounds;
5.4.b	mixtures including solutions; and
5.4.c	effect of heat on the states of matter.
	Living Systems
5.5	The student will investigate and understand that organisms are made of cells and have distinguishing characteristics. Key concepts include
5.5.a	basic cell structures and functions;
5.5.b	kingdoms of living things;
5.5.c	vascular and nonvascular plants; and

	Grade Five Virginia Standards of Learning Science (2003)
5.5.d	vertebrates and invertebrates.
	Interrelationships in Earth/Space Systems
5.6	The student will investigate and understand characteristics of the ocean environment. Key concepts include
5.6.a	geological characteristics (continental shelf, slope, rise);
5.6.b	physical characteristics (depth, salinity, major currents); and
5.6.c	biological characteristics (ecosystems).
	Earth Patterns, Cycles, and Change
5.7	The student will investigate and understand how the Earth's surface is constantly changing. Key concepts include
5.7.a	the rock cycle including the identification of rock types;
5.7.b	Earth history and fossil evidence;
5.7.c	the basic structure of the Earth's interior;
5.7.d	plate tectonics (earthquakes and volcanoes);
5.7.e	weathering and erosion; and
5.7.f	human impact.

Grade Six

	Grade Six Virginia Standards of Learning Science (2003)
	Scientific Investigation, Reasoning, and Logic
6.1.b	a classification system is developed based on multiple attributes;
6.1.c	precise and approximate measures are recorded;

	Grade Six Virginia Standards of Learning Science (2003)
6.1.d	scale models are used to estimate distance, volume, and quantity;
6.1.e	hypotheses are stated in ways that identify the independent (manipulated) and dependent (responding) variables;
6.1.f	a method is devised to test the validity of predictions and inferences;
6.1.g	one variable is manipulated over time with many repeated trials;
6.1.h	data are collected, recorded, analyzed, and reported using appropriate metric measurement;
6.1.i	data are organized and communicated through graphical representation (graphs, charts, and diagrams);
6.1.j	models are designed to explain a sequence; and
	Force, Motion, and Energy
6.2	The student will investigate and understand basic sources of energy, their origins, transformations, and uses. Key concepts include
6.2.a	potential and kinetic energy;
6.2.b	the role of the sun in the formation of most energy sources on Earth;
6.2.c	nonrenewable energy sources (fossil fuels, including petroleum, natural gas, and coal);
6.2.d	renewable energy sources (wood, wind, hydro, geothermal, tidal, and solar); and
6.2.e	energy transformations (heat/light to mechanical, chemical, and electrical energy).
6.3	The student will investigate and understand the role of solar energy in driving most natural processes within the atmosphere, the hydrosphere, and on the Earth's surface. Key concepts include
6.3.a	the Earth's energy budget;
6.3.b	the role of radiation and convection in the distribution of energy;

	Grade Six Virginia Standards of Learning Science (2003)
6.3.c	the motion of the atmosphere and the oceans;
6.3.d	cloud formation; and
6.3.e	the role of heat energy in weather-related phenomena including thunderstorms and hurricanes.
	Matter
6.4	The student will investigate and understand that all matter is made up of atoms. Key concepts include
6.4.a	atoms are made up of electrons, protons, and neutrons;
6.4.b	atoms of any element are alike but are different from atoms of other elements;
6.4.c	elements may be represented by chemical symbols;
6.4.d	two or more atoms may be chemically combined;
6.4.e	compounds may be represented by chemical formulas;
6.4.f	chemical equations can be used to model chemical changes; and
6.4.g	a limited number of elements comprise the largest portion of the solid Earth, living matter, the oceans, and the atmosphere.
6.5	The student will investigate and understand the unique properties and characteristics of water and its roles in the natural and human-made environment. Key concepts include
6.5.a	water as the universal solvent;
6.5.b	the properties of water in all three states;
6.5.c	the action of water in physical and chemical weathering;
6.5.d	the ability of large bodies of water to store heat and moderate climate;
6.5.e	the origin and occurrence of water on Earth;

	Grade Six Virginia Standards of Learning Science (2003)
6.5.f	the importance of water for agriculture, power generation, and public health; and
6.5.g	the importance of protecting and maintaining water resources.
6.6	The student will investigate and understand the properties of air and the structure and dynamics of the Earth's atmosphere. Key concepts include
6.6.a	air as a mixture of gaseous elements and compounds;
6.6.b	air pressure, temperature, and humidity;
6.6.c	how the atmosphere changes with altitude;
6.6.d	natural and human-caused changes to the atmosphere;
6.6.e	the relationship of atmospheric measures and weather conditions;
6.6.f	basic information from weather maps including fronts, systems, and basic measurements; and
6.6.g	the importance of protecting and maintaining air quality.
	Living Systems
6.7	The student will investigate and understand the natural processes and human interactions that affect watershed systems. Key concepts include
6.7.a	the health of ecosystems and the abiotic factors of a watershed;
6.7.b	the location and structure of Virginia's regional watershed systems;
6.7.c	divides, tributaries, river systems, and river and stream processes;
6.7.d	wetlands;
6.7.e	estuaries;
6.7.f	major conservation, health, and safety issues associated with watersheds; and

	Grade Six Virginia Standards of Learning Science (2003)
6.7.g	water monitoring and analysis using field equipment including hand-held technology.
	Interrelationships in Earth/Space Systems
6.8	The student will investigate and understand the organization of the solar system and the relationships among the various bodies that comprise it. Key concepts include
6.8.a	the, sun, moon, Earth, other planets and their moons, meteors, asteroids, and comets;
6.8.b	relative size of and distance between planets;
6.8.c	the role of gravity;
6.8.d	revolution and rotation;
6.8.e	the mechanics of day and night and phases of the moon;
6.8.f	the unique properties of Earth as a planet;
6.8.g	the relationship of the Earth's tilt and seasons;
6.8.h	the cause of tides; and
6.8.i	the history and technology of space exploration.
	Resources
6.9	The student will investigate and understand public policy decisions relating to the environment. Key concepts include
6.9.a	management of renewable resources (water, air, soil, plant life, animal life);
6.9.b	management of nonrenewable resources (coal, oil, natural gas, nuclear power, mineral resources);
6.9.c	the mitigation of land-use and environmental hazards through preventive measures; and

	Grade Six Virginia Standards of Learning Science (2003)
6.9.d	cost/benefit tradeoffs in conservation policies.
